Introduction to Cloud Computing

November 12 – 14, 2024   **PIM, Karachi**   **Rs. 41,000/=**

Course Description

Cloud computing has become an indispensable enabler of digital transformation, driving innovation, efficiency, and growth across industries in today's interconnected world. Its importance will continue to grow as businesses increasingly rely on cloud services to stay competitive and resilient in the face of evolving challenges and opportunities.

LEARNING OUTCOMES

- Understand cloud computing fundamentals and key concepts.
- Familiarize yourself with major cloud service providers and their offerings.
- Learn to design scalable, resilient, and cost-effective cloud architectures.
- Understand different cloud deployment models and choose the appropriate one.
- Gain skills in managing and monitoring cloud resources efficiently.
- Develop knowledge of business continuity and disaster recovery solutions in the cloud.

COURSE CONTENTS:

- Introduction to Cloud Computing
- Cloud Service Models
- Cloud Deployment Models
- Major Cloud Providers
- Business Continuity and Disaster Recovery

TARGET AUDIENCE:

Anyone interested in understanding cloud computing's principles and applications should attend a course, including IT professionals, developers, project managers, and business leaders. Whether you're seeking to expand skills, manage cloud projects, or make informed IT decisions, a course provides valuable insights.
